World Series Will Go Seven Games

Present Standing - Washington 3, Pittsburg 3

To-day's Game Postponed - Rain

By their win yesterday, the
Pittsburg Pirates tied up the
world series, which now will go
the full seven games. The final
game, scheduled for to-day was
called off on account of rain.
(This is the second game in the
series to be postponed). The
game will be played, weather
permitting, at Pittsburg to-
morrow.

The Games To Date

First Game, Wednesday.
Pittsburg 000 010 000-1 8 1
Washington 010 020 001-4 5 0

Second Game, Thursday.
Pittsburg 000 100 02-3 7 9
Washington 010 030 001-2 8 2

Third Game, Saturday.
Pittsburg 001 001 20-4 10 1
Pittsburg 010 101 000-3 8 2

Fourth Game, Sunday.

Pittsburg	3	16	49	5

An illustrated lecture will be
given in Oyen United Church
on Tuesday, October 20, at 8 p.m.
by Rev. C. R. Corecan, entitled
"The Sky Pilot" by Ralph Con-
nor. Previous to the lecture a
number of slides will be shown
illustrating "Puss in Boots".
Everybody welcome.

A Halloween party and ba-
zard will be held in Hill's School
on Friday, October 30, under
the auspices of Hill's C.W.F.A.
Supper served at midnight.

We have been fortunate in
securing an exclusive line of
business and personal greeting
cards. Call in and see them.

Women's Institute

The annual East Acadia Con-
vention was held in Oyen Un-
ion Church last Monday. Mrs.
Regan, convener, occupied the
chair. Mrs. Montgomery, dis-
trict director, was the speaker
of the day. The convener's and
secretary's reports were accept-
ed as read. The convener urged
the Institutes to send their
yearly contribution to the Pro-
vincial Fund early in January.

The address of welcome was
given by Mrs. Wright, Oyen,
and responded to by Mrs. An-
derson, Exel.

Dr. Jenkins, of the provincial
health department, gave a very
instructive lecture on "Preven-
tive Diseases". Mrs. Huyck's
letter on "Helpers For Rural
Householders" was read, and
excusing the immigration
clause, was endorsed.

Mrs. Wright, as convener on
Education, gave a much appre-
ciated talk on the work in the
province and in our district.
Mrs. Montgomery urged each
Institute to send a collection of
canned fruit, fish and meat to
the 1926 Toronto Exhibition.
Much interest was shown in the
reports of the Institutes, seven
being represented via Beaton, 5
Exel, 5, Fairness, 5, Laidlaw, 5,
Sibbald, 10, Springburn, 4 and
Oyen.

The following officers were
elected: Convener, Mrs. H. M.
Regan, Springburn. Secretary,
Treasurer, Mrs. C. S. Wright,
Oyen. Convener: Education,
Mrs. J. Naismith, Oyen. Legis-
lature, Mrs. E. Bray, Sibbald.
Immigration, Mrs. W. Hebl,
Springburn: Household, Eco-
nomics, A. L. Orvis, Laidlaw.
Agriculture, Mrs. F. Beynon,
Rush Creek. Canadianization,
Mrs. S. A. Miller, Oyen.

Mrs. F. L. Aylesworth enter-
tained last Thursday afternoon
at a fruit and pickle shower for
Mrs. C. R. Corecan. Harvest
decorations were artistically ar-
ranged about the rooms and
the gifts were drawn in by Bell
Whitlock, in a decorated wagon.

B. H. Dial will sell at public
auction the farmstock, imple-
ments, household effects etc.,
owned by Gus Morris, at his
farm on the north belt, 10 to 30
13 miles north of Beaton, on
Wednesday, October 28. Sale
to commence at 12 noon. Lunch
served.

Oyen School District, No. 3056

Ratepayers in the above
school district are reminded

SPECIAL TRAINS

WESTERN CANADA TO THE SEABOARD FOR OLD COUNTRY SAILINGS CHRISTMAS AND NEW YEARS

SPECIAL SLEEPING CARS FROM VANCOUVER, EDMONTON, CALGARY, SASKATOON,
REGINA, CONNECTING AT WINNIPEG FOR THESE TRAINS.

FIRST TRAIN leave Winnipeg 10 a.m., November
24 to Montreal for sailing of S.S. "Canada" on
November 27 to Liverpool.
SECOND TRAIN leave Winnipeg 10 a.m., Decem-
ber 2, to Halifax for sailing of S.S. "Grotting-
holm" on December 5 to Goteborg.
THIRD TRAIN leave Winnipeg 10 a.m., Decem-
ber 5, to Halifax for sailing of S.S. "Orcic" on De-
cember 7 to Queenstown and Liverpool.

FOURTH TRAIN leave Winnipeg 10 a.m., Decem-
ber 10, to Halifax for sailing of S.S. "Megantic"
on December 13 to Glasgow and Liverpool.
FIFTH TRAIN leave Winnipeg 10 a.m., Decem-
ber 11, to Halifax for sailing of S.S. "Assam"
on December 14 to Plymouth, Cherbourg, Lon-
don; S.S. "Athenia" on December 14 to Glas-
gow; S.S. "Orizaba" on December 14 to Cher-
bourg and Southampton.

SPECIAL THROUGH TOURIST AND STANDARD SLEEPING CARS
will be operated (if traffic warrants) from Vancouver, Edmonton, Calgary, Saskatoon, Regina,
Winnipeg for the following sailings:

S.S. "Lettitia," November 20, from Montreal to
Glasgow.
S.S. "Autonia," November 21, from Montreal to
Plymouth, Cherbourg and London.
S.S. "Regina," November 21, from Montreal to
Glasgow and Liverpool.

S.S. "Haiti City," November 22, from Halifax to
Norway, Sweden also Finland and Baltic
States.
S.S. "Ohio," November 30, from Halifax to Cher-
bourg and Southampton.
S.S. "Arabia," December 4, from Halifax to Ply-
mouth, Cherbourg and Hamburg.

We will be pleased to give you full details, and assist you in planning
your trip, make reservations, etc.

WEDNESDAY, OCTOBER 14

Canadian Apples For The Old Country

The crop of Canadian apples this year is better than ever, and what could be a more delightful remembrance from this side to our friends across the seas than a box of hand-picked and hand-picked Canadian apples. Your grocer can fill such an order and the Canadian National Express will transport and deliver by quick service, to any station in Great Britain or Ireland, from Montreal or Quebec up to November 15, and from Saint John, N.B. and Halifax, thereafter, at the rate of \$3.00 per standard box of apples not exceeding one cubic foot eight inches in measurement or fifty pounds in weight. Rate includes refrigeration on steamships. Consult any Canadian National Express Agent as to further particulars.

"Hello Bill" Comedy is Coming

"Hello Bill", which comes to Oyen Theatre, Thursday, October 22, comes backed up with a reputation for provoking more laughs than any farce comedy written in recent years.

The production is new throughout—in lines and situations it is hard to reckon on anything but this meretricious and pleasing comedy success.

The Cobb Warren Gratias Amusement company, in association with Mr. Alfred Layne have left nothing to chance in marking this production as one of the outstanding theatrical events of the current season.

The cast includes such favorites as Miss Madalyn Gray, who was long associated with the Heloise forces in San Francisco, Miss Muriel Owen who startled the California city with her magnetic personality in the comedy success "Best People" and Mr. Don Austin, of the Duffy Players of the same city.

Beautiful scenic and electric effects, more than a laugh a minute, a cast of players each of individual fame, will undoubtedly mark this attraction as one of the finest presented here in many a season.

CLASSIFIED ADS.

WANTED

WANTED—Capable girl for general housework during winter months. Good quarters in comfortable home. Good salary, apply: Mrs. G. S. Peck Oyen, Alta.

WANTED—A good fresh milk cow. Apply at once to J. W. Chavins, Excel, Alta. Phone 518.

The most urgent requirement in Canada's Agricultural Products

CANADA produces every year large quantities of wheat, oats, barley, butter, cheese, bacon, beef, eggs, apples, potatoes, grass seed and clover seed that she cannot consume. Her natural outlet for these products is, of course, Great Britain—the one great consuming country of the world with an open market.

Unfortunately, nearly every other country with any surplus of food products seems to want to send its surplus to this same market.

The keenness of the competition on this, our only market, and the energy and resourcefulness of our competitors began to impress themselves upon the Department of Agriculture some time ago, but it is only within very recent years that the real and only way to grapple with this problem has been discovered, or at least put into effect. This Department now believes, as do also most of the farmers of this country, that the "grading" of our agricultural products is the policy and practice that is seeing us through the struggle and will assure us of our rightful place on the British market.

"Grading" means the classifying of products, whether they be hogs, butter, cheese, eggs or anything else, into what might be called in a general way "BEST," "GOOD," "FAIR" and "POOR" classes.

These exact words are not used in describing the grades, but that is what is meant. The purpose served in grading is threefold—

- (1) Educational. When the producer of the relative quality of his product he is spurred on to maintain that quality if it is the "best" or to improve the quality where necessary.
- (2) Fair Play. When products are not graded the inferior article for various reasons often brings as much as the superior article, and the credit and advantage of putting the superior product on the market is lost to the one who really deserves it.
- (3) Facilitating Trade. The dealer learns to have confidence in the article he is buying and buys more freely, because it is guaranteed by grading, and gradually everybody gets to know that the "best" article really looks like it tastes like. In short, grading brings about standardization and ensures to the producer the best price.

Canada now grades her cereals, grass seeds, hay, potatoes, apples, eggs, butter, cheese, wool and bacon hogs. The results have been every way beneficial and in some cases quite markedly so, even though the grading system has been in effect in some cases for only two or three years, thus—

Cheese—Grading began April 1st, 1923. Canadian cheese the year before had fallen into such disrepute on the British market that New Zealand cheese was quite commonly preferred. Today Canadian cheese commands some ten pounds higher than New Zealand.

Butter—Grading began same time as for cheese. The reputation of our butter was then indeed at low ebb. Canadian butter today, while not the best on the market, is rapidly improving in quality and gaining in reputation.

Hogs—Over two years ago the Department of Agriculture began to grade live hogs at the packing houses and stock yards. The UK premium paid by the packers for "select" bacon hogs as against "flesh smooths" as called by departmental graders has done wonders to improve the quality of our hogs and develop the bacon industry.

Best Canadian hogs, which ordinarily was quoted two years ago from 10 to

18 shillings a long hundredweight below Danish, has gradually grown in the estimation of the British wholesale buyer until it is now quoted at only from 1 or less to at most 3 or 4 shillings per long hundredweight below the best Danish.

This improvement in price is, of course, due to quality and has come about very gradually, the spread narrowing down by a shilling or two a month until now it is not at all a rare occurrence to see best Canadian selling on a par with the Danish article.

Eggs—Canada was the first country to grade and standardize eggs. These grades and standards apply not only to export, interprovincial and import shipments, but also to domestic trading.

The basic is inferior quality, cleanliness and weight.

Standardizing Canadian eggs has established confidence between producer and consumer and between exporter and British importer, and has resulted in a greatly-increased demand for the Canadian egg both at home and abroad.

Other products might be mentioned where grading has worked to the great advantage of the producer and to the advancement of Canadian agriculture.

Already Great Britain recognizes our store cattle, wheat, cheese, eggs, apples and oats as the best she can buy.

It is for us to so improve our other products, particularly our butter and bacon, as to bring them also into this list of "the best on the British market" and consequently the highest priced.

Grading enabled us to do this for cheese, wheat, eggs and apples.

Grading is enabling us to do it for butter and bacon.

Quality Counts

Quality is the first requirement for the Canadian export trade. It is the only regular and reliable basis for the export trade. Agriculture is working for educational, moral and the result of this policy is seen in the growing volume of Canada's agricultural exports. Look at these figures—

Canada's Principal Exports of Farm Products	
Wheat (bushels)	1,000,000
Flour (bushels)	1,000,000
Barley (bushels)	1,000,000
Oats (bushels)	1,000,000
Hay (tons)	1,000,000
Butter (cwt.)	1,000,000
Cheese (cwt.)	1,000,000
Eggs (cwt.)	1,000,000
Apples (bushels)	1,000,000
Potatoes (bushels)	1,000,000
Beef (cwt.)	1,000,000
Pork (cwt.)	1,000,000
Bacon (cwt.)	1,000,000
Wool (bales)	1,000,000
Grain (cwt.)	1,000,000
Stock (cwt.)	1,000,000
Feed (cwt.)	1,000,000

The Touring Automobile As A Means Of Unifying The Far-Flung Sections of Canada

How much is tourist development really worth to Canada?

There are two ways of looking at it. The usual way is to view it through financial phases. One needs only to glance at the figures cited by various authorities to realize that the money now spent in Canada every year by tourists from abroad has become one of the major items of our national income.

But there is another and perhaps equally important side of the question. Tourist development means a great deal more than the coming of an array of free-spending visitors. There is also the enormous increase in the actual travelling done within the Dominion by the Canadian people themselves. The value of this feature is not to be measured in dollars and cents, but in the sense of national unity.

It has long been a byword that Canada is a "difficult country to govern." The territory of the Dominion is not only far flung, but it is naturally broken into sections which differ as radically as the climate and the population as in physical character and location. How to unify these sections, how to get some real sympathy of outlook and mutual appreciation of the Dominion is not only far from easy, but it is naturally broken into sections which differ as radically as the climate and the population as in physical character and location.

How to unify these sections, how to get some real sympathy of outlook and mutual appreciation of the Dominion is not only far from easy, but it is naturally broken into sections which differ as radically as the climate and the population as in physical character and location.

Marketing Eggs Co-operatively

Assistance to Farmer in Securing a Better Price

Eggs demand the most efficient and rapid handling methods that can be devised and for a number of years the direction of improved methods with salutary results. The Federal and Provincial Governments are co-operating for the purpose of securing a solution of the problem. National standards have been devised by which eggs may be graded and standardized and the co-operative egg circles have been given of great assistance in this work and in improving packing methods.

A bulletin issued by the Dominion livestock branch gives detailed information as to how to organize one of these egg circles and how the financial and other advantages to be derived from the co-operative egg circles can be obtained.

By cutting down expenses and by catering to the requirements of better markets for the products than he would by doing his own marketing, the egg circles may also find themselves up to large co-operative marketing associations which are now being organized in various parts of the Dominion.

The bulletin, which is distributed by the Publications Branch, Department of Agriculture, Ottawa, gives detailed information on the marketing of eggs and poultry.

Would Dispel Superstition

To Curb Fables of Magician Over Lower Classes in Turkey

To combat the power of the "magician" the lower classes of the people and their belief in the "evil eye," numerous Turkish doctors are to be sent into the interior of the country, where medical science is unknown.

In the small villages they will endeavor to dissipate the superstitions of the illiterate Turks who believe that the only remedy for disease is the magical power of the "evil eye."

The decision to send the doctors on this mission was decided upon at the first medical congress ever held in Turkey, called by President Mustafa Kemal at the Turkish capital, Ankara.

Thirty-eight participants in all were first released for experimental purposes. They withdrew the rigor of winter, weather here in splendid fashion and none was reported to have died. One convey was being sighted about five miles away from where they were hatched, which would indicate that the birds were widening the radius of their flight.

Experiment Is Success

Partidges Imported to Manitoba From Hungary Are Increasing

The Partidge party imported to Canada and released in the Neopawa district by the Brandon game protective branch, are rapidly increasing in number. This fact was announced by J. H. Hales and R. M. Matheson, K.C., who have just completed a tour of inspection in the district.

Thirty-eight partidges in all were first released for experimental purposes. They withdrew the rigor of winter, weather here in splendid fashion and none was reported to have died. One convey was being sighted about five miles away from where they were hatched, which would indicate that the birds were widening the radius of their flight.

Marketing This Year's Grain

Figures Give Idea of How Big Wheat Crop Really Is

If all the wheat marketed during September along the Canadian Pacific Railway were baked into bread and divided into standard, twelve-wagon, each wagon containing 1,000 bushels and travelling at the rate of five miles an hour, it would take eight and a half weeks for these wagons to pass a given point. This is the statement given out at Winnipeg by the statistician of the transportation department of the C.P.R.

The marketing of grain on the C.P.R. in September amounted to 62,000 bushels. In the first week of this month it is at the rate of 75 bushels per second.

Says Oyster Becoming Extinct

That the oyster is "going the way" of the buffalo and the elk, and within 10 years will be an expensive rarity," is the opinion of W. P. Downer, secretary of the Atlantic Fisheries Association. From 1912 to 1922, he said, the oyster fishery on the Gulf of St. Lawrence was valued at \$1,000,000 to \$1,500,000.

World Supply Britain With Canadian Meat

Vancouver Man Submits Perfected Plans to British Government

Canada will become the chief source of the meat supply of Great Britain, and Western Canada, generally, will benefit largely if the proposal of Major E. J. Palmer, Vancouver, which has received the approval of the British Government and the agricultural department of Ontario, are carried out.

Major Palmer's scheme is the shipment of chilled meats from both coasts of the Old Country. The scheme, which is Dominion-wide in its scope, contemplates not only the establishment of a chain of necessary plants in Eastern and Western Canada, but the organization of centres in Great Britain, Vancouver and Montreal, and one of the winter ports of the eastern coast.

Major Palmer is president of a Vancouver coal company, but has had years of experience in the meat packing and shipping industry. "He was at one time manager of the Pacific Finance Association, one of the largest exporting organizations in Australia, took a volume of trade with Great Britain that ran into hundreds of thousands tons yearly."

During the South African war he was chief of meat supplies for the army and the civilian population of the Natal and Transvaal. After coming to Canada he headed a commission for Alberta to consider the supply of the British market with fresh meats, and it was following this that he perfected plans that he has now laid before the British Government, through Prime Minister Gladwin.

Korean Nobles Are Poor

Once Wealthy But Now Forced to Perform Menial Tasks

The Korean nobility with the exception of a few privileged people, is reported to be suffering from extreme poverty. Several of the nobles who were once wealthy, are now working as cart pullers and performing other menial tasks as the only means of earning their living.

At the time of the annexation of Korea by Japan, about 60 of the leading Koreans were created peers and given property by the Japanese Government. Most of them ran through this property rapidly. Recently 20 of the impoverished Koreans made a petition to the Japanese Government asking for financial assistance.

The petitioners requested that mountain climber be requested to pay their bills in advance by one Alpha bond.

Nurse Crop For Sweet Clover

Tests Show Winter Killing Less Likely Than in the Past

Tests at the Brandon experimental farm emphasize the fact that sweet clover is much more successfully protected when sown with a winter crop than when sown alone. The yields of the various nurse crops are in no way reduced due to the presence of the sweet clover and the slightly increased yield the following season in favor of seedling alone is insignificant.

The winter crop also affords considerable protection and hence winter killing is less likely to occur.

Man was made to mourn, but a widower usually outlives it.

Hunting Big Game in the Kootenays

How the hunter gets the most out of his trip

The picture was taken at Nelson, British Columbia, in the heart of the Kootenay district. The hunter there are plentiful and the sportmen who go there always come away, if not laden as above, at least with a goodly supply of trophies to show and trifling stories to tell their friends.

The fall, of course, is the best open season. Then it is that the outdoor-loving Canadian takes down the good old blunderbuss, looks it over carefully, signs out the old mackinaw and corduroys and the long boots, rushes for his game license and hits the trail for the fall timber as fast as his legs or his gun will carry him. The hunter there are plentiful and the sportmen who go there always come away, if not laden as above, at least with a goodly supply of trophies to show and trifling stories to tell their friends.

The fall, of course, is the best open season. Then it is that the outdoor-loving Canadian takes down the good old blunderbuss, looks it over carefully, signs out the old mackinaw and corduroys and the long boots, rushes for his game license and hits the trail for the fall timber as fast as his legs or his gun will carry him. The hunter there are plentiful and the sportmen who go there always come away, if not laden as above, at least with a goodly supply of trophies to show and trifling stories to tell their friends.

Develops New Potato

Early Originated at Raymond, Alberta, Is of Superior Quality

"Early Queen" is the name given to a new potato originated by H. H. Kimball, truck gardener of Raymond, Alberta. The tuber is of the white variety, combining earliness, low flavor, cooks well and is of an excellent keeping quality.

Three years ago Mr. Kimball imported sufficient registered stock of Wm. Macgregor potatoes to seed three acres. To maintain purity of strain, the grower made application for government inspection. The professional man suggested that a number of hills of "mongrel stock" be uprooted. A stake was driven in the hills designated for destruction. When Mr. Kimball started to dig up the spuds, he was surprised to note that the earth surrounding the vines was forced up until the tubers were showing and all indications pointed to a heavy yield.

They were left until harvest, when the clean, white appearance attracted the gardener that a test in a larger plot was made the following year. Not until mid-July was the crop dug. The earliness of the "mongrel" discovered.

This year the white potatoes were planted side by side with the "Early Queen" a pink variety, known for its early ripening. The white potato beat the old favorite by 18 days. This new variety is now letting its abundant promise for next year's seedling.

The Wheat Pool

Success of the Pool in Its First Year of Operation Is Most Gratifying

The wheat pool has made a final payment of \$1,000,000 to the growers of the 1922 crop, after deducting carrying charges in both country and terminal elevators. Three-quarters of a million dollars has been set aside as a reserve and \$5 elevators have been bought or built.

The wheat pool in its first year is most gratifying not only to the farmers of Western Canada, but to the business world, the financial institutions of the country as well as Western Canada. Any economy in the handling of our main cash crop is a gain for the country as a whole, for the wheat crop of the west speeds up or slows down the wheels of industry in the east—San Francisco, New York, London.

Nursing Standards Are High

Comparing the activities of the last congress of the International Council of Nurses held in 1921 in London, with those of the congress held this year in Finland, one notices a great advance in nursing education since the pre-war days, said Miss M. P. Hersey, chief-in-charge of nurses at the Royal Victoria Hospital, Montreal, on her return from the conference in Finland.

Canadian Bond Sales

Canadian bond sales for the beginning of the current year up to September 5, totaled \$221,005,225, an increase with \$48,661,347 in the corresponding period of 1921 and with \$1,000,000 in 1920. So far this year of the total Canadian bond sales, \$187,500,000 has been sold in the United States; \$185,282,195 in Canada and \$27,517,533 in Great Britain.

League Of Nations Might Profitably Study Relationship Between Canada And U. S.

Seed Registration In Western Provinces

Inspection Just Finished Shows Large Increase in Barley

A decrease in total acreage of registered seed inspected in the western provinces is counter-balanced this year by a considerable improvement in yield, according to the final returns from 11 inspectors who have completed the Canadian Seed Growers' Association field work for this year, working under the seed branch of the Dominion department of agriculture.

Inspections were made at 240 plots of 740 seeds owned by 287 farmers, and comprising 37,600 acres. The acreage is about 5 per cent. under that inspected last year, but the total number of seeds is greater by 50,000.

A feature of the work this year, states J. E. Blakeman, chief inspector for the Dominion seed branch, is the large increase in registered barley. There is no grain where purity as to variety is more important, since the large increase in registered barley greatly on this feature.

The varieties grown most largely were Hanzhen, in Saskatchewan, which had four times last year's acreage, and O. A. C. 21, which was sown on an acreage ten times greater than in 1921. There was also increase in Marquis wheat, also in Banner oats, Kola and Minidom are not on the registered list, but several inspectors were made of the Marquis and Minidom may shortly be added to the eligible list.

Butter and Cheese Output

Growth of Dairy Industry in Canada Is Shown by Returns

The manufacture of creamery butter in Canada in 1922 showed an increase over 1921 in every province except Prince Edward Island and New Brunswick, in Nova Scotia by 28,382 lbs. in Quebec, by 8,831,490 lbs. in Ontario by 5,531,401 lbs. in Manitoba, by 1,262,814 lbs. in Saskatchewan by 2,586,663 lbs. in Alberta by 1,429,035 lbs. and in British Columbia by 719,206 lbs. 1924 was a record year for the manufacture of butter in Canada, with 18,200,000 lbs. over 1920,000 lbs. in excess of the 1921 record.

In the produce of the dairy industry cheese there was an increase in 1924 compared with 1923 of 215,000 lbs. in Prince Edward Island, of 115,000 lbs. in New Brunswick, of 4,682,323 lbs. in Ontario, of 264,257 lbs. in Manitoba, in Saskatchewan of 20,211 lbs. in British Columbia of 27,453 lbs. Nova Scotia was practically stationary, but there was a decrease in Quebec and Alberta, both of which showed a net increase over the output in 1922.

Retain Name Of Marquis Wheat

Not Sufficient Difference To Warrant Introduction of New Names

A decision against giving new names to the various strains of Marquis wheat registered for registration under the rules of the Canadian Seed Growers' Association was reached at a meeting of the Saskatchewan provincial seed board.

The board discussed a resolution recently adopted by the executive of the Canadian Seed Growers' Association in consultation with I. H. Newman, Dominion cerealist, and came to the conclusion that there was sufficient difference between the strains of Marquis wheat to warrant the introduction of new names, which would only be confusing to growers. They favor the retention of the numbers used at present to designate the various strains.

An analytical study of the various strains of Marquis wheat was presented to the provincial board meeting in its fourth, of the provincial field crops branch.

We Sing It All Right

A Toronto musician is quoted as saying that "O Canada" is not a national anthem, and is not up to the highest standard for a musical composition. Possibly he is right; but it is not really a national anthem. It has a strong hold on popular favor. It is not up to the highest standard as a musical composition, that would be nothing to worry about. A national anthem for Canada, the musician said, and that is something which a musical composition of the highest standard might fall far below—Chalmers News.

Little On Cruise's Island

Hotel handsbly will be in store for anyone in the future. In an attempt to attract tourists to the Robinson Crusoe Island of Juan Fernandez. The Government of Chile proposes to erect a hotel on the island of Robinson Crusoe, to attract tourists to the island and to commodate the large number of tourists.

The governments represented in the League of Nations are studying the recent extradition treaty between Canada and the United States, covering such matters as the extradition of offenders against law and order, and other dangerous drugs, with a view to the conclusion of similar treaties among them. It is recommended to this effect recently was approved by the league council on recommendation of its permanent commission.

The wisdom of good example not always is lost, nor often, let it be hoped; eventually good example must influence to contemporary emulation among nations, as among individuals.

The council and the league probably have been studying the relationship existing between the United States and Canada. Their common values that material relations and this situation has endured for more than a century; there appears to be no reason to doubt that it will continue to endure for centuries to come.

Canada and the United States have demonstrated to the world the wisdom of justice, confidence, reason and faith as applied to international association. The relationship between Canada and the United States is developing as no other nation ever developed in the past. Canada, and the United States are engaged in a unique international relationship—a partnership in which are incorporated higher and more important values than material relations, any grave crisis menacing the interests of either, it is rather certain that the other would be found ready to meet the emergency spontaneously and unhesitatingly.

Just the other day, in majestic Stanley Park in 1921 showed an increase over 1921 in every province except Prince Edward Island and New Brunswick, in Nova Scotia by 28,382 lbs. in Quebec, by 8,831,490 lbs. in Ontario by 5,531,401 lbs. in Manitoba, by 1,262,814 lbs. in Saskatchewan by 2,586,663 lbs. in Alberta by 1,429,035 lbs. and in British Columbia by 719,206 lbs. 1924 was a record year for the manufacture of butter in Canada, with 18,200,000 lbs. over 1920,000 lbs. in excess of the 1921 record.

In the produce of the dairy industry cheese there was an increase in 1924 compared with 1923 of 215,000 lbs. in Prince Edward Island, of 115,000 lbs. in New Brunswick, of 4,682,323 lbs. in Ontario, of 264,257 lbs. in Manitoba, in Saskatchewan of 20,211 lbs. in British Columbia of 27,453 lbs. Nova Scotia was practically stationary, but there was a decrease in Quebec and Alberta, both of which showed a net increase over the output in 1922.

The board discussed a resolution recently adopted by the executive of the Canadian Seed Growers' Association in consultation with I. H. Newman, Dominion cerealist, and came to the conclusion that there was sufficient difference between the strains of Marquis wheat to warrant the introduction of new names, which would only be confusing to growers. They favor the retention of the numbers used at present to designate the various strains.

The Best Pay Best

Good Quality of Cattle Always in Demand When Marketing

An ancient story of the last monthly review of livestock conditions by the market intelligence division of the livestock board of Canada is a story that cannot too strongly be impressed upon the breeders and sellers. Good quality cattle, the review says, were scarce in demand and enjoyed a good outlet at fairly strong prices, but medium and common grades were slow to move and the average of the offerings, were rather hard to sell and at most markets closed at lower prices. Good quality feeders were in demand but other sorts were slow in sale. A similar story is told of all classes of livestock. Sublimely, indeed, in price three to four dollars over what they brought in the month of August last year. They also showed an increase in numbers in Montreal and the west.

Slightly Mistaken

It Was Just Another Sample Case of Mistaken Identity

How the identity of the immortal thing may be confused with that of the immortal deed is illustrated in the case of the viceroy in Westminster Abbey, who was carrying a party of North English visitors through his historic abbey, and pointing out the resting places of Britain's famous men. "Here," he explained, as he passed before the tombstone of the great essayist, "is the tomb of Addison!" The customary interval of impressive silence was broken by a dusky northern visitor from the rear of the crowd. "Ay, hush! the tomb is as inverted the grammar!"

Easy

Lloyd (after a momentary silence) —"Do you suppose that you will ever tire of him?"

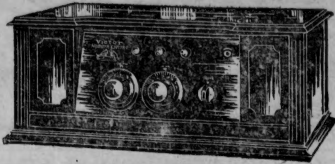

"No," said the other, "I can't think of any reason why I shouldn't."

Recipe for Longevity

The steady, hard, crocodile and turtle life, says the old proverb, is the recipe for longevity. They don't strain themselves to make it snappy.
